

You'll surely know the story: a wife and her three children are murdered by her husband in their sleep. But when she tries to escape from the evil entity that haunts and kills them, she finds herself in an asylum with no memories of how he found her. That is until they release a new serial killer into the facility who has his sights set on her daughter and this time, there won't be anyone who will save her. This is the plot of the brand new release, 1920 Evil Returns which stars horror icons, Robert Englund and Jewel Shepard. The film has been directed by John Schneider who is best known for his role playing Bo Duke in The Dukes of Hazzard television show. While there are many people who believe this to be a classic case of the c word (Copycat) it does take some creativity to come up with an original storyline. And while it doesn't measure up to other recent horror movie hits like Dead Silence, it looks like it will be entertaining enough to go out and purchase on DVD. October cannot come soon enough.
